PROFESSIONAL EXPERIENCE

Software Engineer

Jul 2025 – Present

WizCommerce — B2B eCommerce SaaS

Gurugram, India

- Co-architected a multi-brand headless storefront platform (**React 19**, **Next.js 16**, **Node.js**, **PostgreSQL**) with a **4-engineer platform team**, compiling merchant-authored JSON into server-rendered React across **87 configurable modules** and **800+ routes**, letting merchants ship storefront changes with **zero redeploy**s.
- Designed **174 REST APIs** on a **Node.js** REST APIs layer with cookie-based sessions, **Redis** caching, and typed data-access modules over **PostgreSQL/Prisma**, isolating per-buyer pricing from a shared multi-tenant cache and keeping tenant credentials out of the browser.
- Modeled the storefront's page and theme data as versioned **JSON documents** with draft/publish state machines, designing the schema and query layer so a merchant edit resolves to a rendered page in a single read without joins across **20+ relational tables**.
- Improved storefront performance through server-side data resolution and a tag-based cache invalidation hierarchy that shrank a product update's blast radius from **828 routes to 1** — improving **LCP 65% (3.4s → 1.2s)** and cutting shopper JS bundle by **35%** at **95% cache hit rate**.

Software Engineering Intern

Jul 2024 – Jun 2025

WizCommerce — B2B eCommerce SaaS

Gurugram, India

- Delivered core storefront features powering **60+ live merchant sites generating \$1M+ in annual revenue**, including a **JSON Logic**-based discount rule engine adopted by **20+ enterprise clients**.
- Owned SEO and observability across **30+ merchant sites** — migrated product-ID URLs to dynamic slugs with structured metadata and canonical tags, and instrumented **25+ key user events** (Sentry, Mixpanel, Klaviyo) with alerting thresholds, giving the product team its first unified view of frontend reliability.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, C++

Backend: Node.js, Express.js, REST APIs, GraphQL, NestJS, Hono

Frontend: React.js, Next.js, React Native, Redux, Zustand, TanStack Query, Tailwind CSS, Vite

Databases & Caching: MongoDB, PostgreSQL, MySQL, Redis, Elasticsearch, Prisma ORM

Cloud & DevOps: AWS (EC2, S3, VPC, IAM), Docker, CI/CD, Jenkins, Turborepo

Tools: Git, Postman, Webpack, Sentry, Mixpanel, Klaviyo

Core Competencies: Data Structures & Algorithms, System Design, Microservices

PROJECTS

CasaLux | *Luxury Short-Term Rental Platform* | Live — GitHub

Mar 2026

- Architected a full-stack rental marketplace as a **Turborepo** monorepo — 4 apps (guest web, host dashboard, React Native mobile, **Node.js** API) and 8 shared packages — with a swappable data layer over **MongoDB** and **PostgreSQL** and pluggable integrations (Cloudinary/S3, Stripe/Razorpay, Elasticsearch/Typesense).
- Engineered a booking concurrency layer using **Redis distributed locks** (SETNX with TTL) and state-machine validation over a **21-model schema**, sustaining **500 concurrent booking requests** on a single listing with **zero double-bookings** under load testing.
- Developed the REST API on **Express.js**, later migrated to Hono to cut serverless cold-start latency **40%**, with **JWT** middleware enforcing role-based access across guest/host/admin routes.

Aivoy | *Multi-tenant AI Concierge SaaS* | Live — npm — GitHub

May 2026

- Shipped a **multi-tenant** AI concierge platform as a single-script embeddable widget (published to **npm**), reducing integration to **under 5 minutes** and enabling any site to add streaming AI chat via Next.js 15 with Clerk workspace management.
- Designed a multi-LLM gateway unifying **5 providers** (OpenAI, Anthropic, Gemini, Groq, Grok) behind one streaming interface at **sub-400ms first-token latency**; tenants swap models from the dashboard with zero code changes, with per-tenant API keys encrypted at rest.

EDUCATION

Chitkara University

Bachelor of Engineering in Computer Science; CGPA: 9.21/10.0

Rajpura, Punjab

Jul 2021 – Jul 2025
